

January 2004

Njini names Mark Peach, former Micromuse Executive as Vice President of Engineering.

Mark Peach's expertise in building world-class engineering departments to build Njini's premier research and development team...

London – Njini Inc. an innovative new business focused at solving current storage problems announced today that Mark Peach has joined in the capacity of Vice President of Engineering, effective immediately. Mr Peach will lead Njini's internal engineering team as it seeks to bring to market its range of innovative software storage products. He will report directly to Njini Chairman and CTO, Phil Tee.

Phil Tee said "having worked previously with Mr Peach at Micromuse, I am aware of his talents and abilities in the arena of software development. With Mark on board, I am confident Njini can build a premier and world-class engineering team capable of acquiring a number one position in the storage software industry".

Prior to joining Njini, Mr Peach served in a variety of senior Executive roles including Vice President of Engineering at Micromuse from the company's inception through to its public offering on Nasdaq in February 1998. In this role, Mr Peach built an industry leading software team that developed a product that remains prominent in the market today, as well as, establishing an excellent reputation for himself in research and innovation.

"Njini is one of the most exciting prospects in the storage software market sector today. I relish the opportunity of working with the Njini team, and with quality as my number one focus, I hope together we can deliver a world class suite of storage software products" said Mr Peach.
